SPECIAL PROJECT INFORMATION SHEET

Project Description	Nose Extension / Torque Reaction for Crane Slewing Ring Bolts		
Date created	22 December 2011	Project Number	Q1184

INTRODUCTION & APPLICATION

Road mobile crane slewing ring bolts require torque tightening but tool access is restricted.

SOLUTION

Special nose extension / torque reaction to reach the slewing ring bolts through chassis apertures, from underneath the truck. Torque reaction is taken from the truck chassis.

TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

Fits 72 series tool with $\frac{3}{4}$ " square drive.
Bearing supported 12" long extension shaft.
