SPECIAL PROJECT INFORMATION SHEET

Project Description	Special exhaust extraction port for PTM-52-800		
Date created	2 August 2010	Project Number	Q1911

INTRODUCTION & APPLICATION

Requirement for torque tightening tools having an exhaust that can be piped outside of a sensitive area. Maximum torque required 800 N.m.

SOLUTION

Pneutorque PTM-52-800 having a special 3/8" BSP female connection in the handle base to enable customer connection of an exhaust tube.

TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

Tool speed is reduced. For this application free speed was reduced from standard 175 RPM to 155 RPM. The tool requires a special calibration with the customer's hose fitted. Other Pneutorque tools could be fitted with a similar exhaust port arrangement.
