SPECIAL PROJECT INFORMATION SHEET

Project Description	Extended Length Hydraulic Tool Calibration Fixture		
Date created	13 April 2012	Project Number	Q2248

INTRODUCTION & APPLICATION

Hydraulic tool calibration application

SOLUTION

7,000 N.m hydraulic tool calibration fixture extended by 160mm to allow for customer's joint simulator fitted between the transducer and input.

TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

Design similar to standard part # 80021 but with cylinder stretched by 160mm to suit joint simulator. Norbar could supply a joint simulator to suit customer's specification if required. Standard transducer range can be fitted per # 80021.
