SPECIAL PROJECT INFORMATION SHEET

Project Description	Angle Display Unit for use with TTT Instrument		
Date created	11 May 2010	Project Number	Q1934

INTRODUCTION & APPLICATION

Calibration laboratory having a Torque Tool Tester 'TTT' instrument, required angle display capability for use with Norbar rotary transducers.

SOLUTION

Angle display unit in a strong die cast metal housing with 1m cable and plug for connection to TTT Instrument, and supplied with a standard external power supply. The unit has a bright LED 8-digit red display, 0.5° angle resolution, angle reset feature, and is supplied with a handbook.

TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

The unit is compatible with TTT series 2 & 3 + TST series 2 instruments.
Series 1 instruments are not compatible but could be factory modified to suit.
The unit is for display only i.e. there is no serial output for angle.
