## SPECIAL PROJECT INFORMATION SHEET

Project Description	Special external shut-off PTM-92 Kit		
Date created	12 September 2011	Project Number	Q2158

### INTRODUCTION & APPLICATION

Torque tightening application requiring high speed run-down and tool shut-off at pre-set torque up to 3,500 N.m via a tool controller.

### SOLUTION

Special Kit comprising the following; -

- Special Pneutorque PTM-92-3500-EC # Q2158.01 with integral solenoid valve & without reaction
- Special sliding type torque reaction with slave 1" drive square # Q2158.03 (*not shown*)
- Standard annular torque transducer # 50754.LOG
- Standard TTT based shut-off type tool controller in wall box # 60244
- Transducer lead # 61126.600
- Solenoid lead # 61130.600

### TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

New PTM-92 / 119 handle assembly now developed for 'EC' (External Controller) use.
