

PAST APPRENTICE

Steve Lawson - Design Engineer

Steve joined Norbar in 1996 after completing his GCSE's.

He attended Oxford College of Further Education to start his mechanical apprenticeship.

The following 2 years Steve worked against an internal training plan, working in all departments to gain experience but to gain a broader understanding of Norbar. During this period he continued to do day release.

Steve spent his final year specialising in the Drawing Office as a Design Engineer.

In 2001 his apprenticeship was complete with an ONC and HNC in mechanical design together with an NVQ Level 3 in Engineering.

Steve was offered a Grade 3 Design Engineer role and after 2 years was promoted to Grade 2 Design Engineer where Steve became more involved in the design of complex products and project work.

He is now a Grade 1 Engineer and looks forward to continuing his long and rewarding career at Norbar.
